MARVIC JOINERY Window Range

Marvic Joinery specialise in the manufacture of windows, doors and bespoke external joinery. Our experienced staff are on hand to offer knowledgeable help and advice on our range of quality windows and doors.

We have now introduced a new range of windows called **Provincial, Heritage and Endurance**. Each range is slightly different depending on site circumstances.

Our commitment to quality and reliability is clear to see in every item we manufacture. We are also aware of our obligations towards the environment and therefore follow strict guidelines on waste management and recycling of our raw materials, air quality and water emissions.

We can offer all of our window ranges in a selection of materials such as Idigbo, Iroko, Oak, Softwood and West African Mahogany. Oak and Softwood can be offered as a laminated

section which helps reduce waste, improve stability and is free of knots which subsequently reduces resin stains.

Windows and doors can be supplied with a base stain, primer coat or fully factory finished.

Marvic Joinery also has a timber bending division in Warwick that can offer Bullseye windows, circular/shaped glazing beads and many other shaped products.

5 Reasons to buy Marvic Joinery Products

- 1 Quality Workmanship Guaranteed
- 2 Free Site Surveys
- 3 Quotations returned within 5 working days
- 4 Factory visits can be arranged before you order
- 5 All windows comply with current building regulations

Provincial Range

Why choose the Provincial range of windows?

The Provincial window is a flush casement window that has the flexibility to use friction hinges with a high security locking system and a variety of styles such as side swing (as shown left), top swing, and fully reversible.

- 1 Trickle Vent (Optional)
- 2 High Security Locking System
- 3 Security Feature to Prevent Unauthorised Entry
- 4 28mm Double Glazed Units – Factory Glazed or Sent Loose
- 5 Choice of Handle Colours
- 6 Weatherseal to Casement or Frame
